

St Katherine's School

29 January 2019

Dear Parent /Carer

This week science teachers have spoken to all Year 11 students about how to approach their final few weeks of science revision before their next mock examinations. A copy of the presentation given to students can be found by clicking on the relevant link below:

[Triple Science](#)

[Combined \(double\) Science](#)

The presentation contains full details of what will be tested in each examination paper, as well as links to revision guide pages, websites, videos and podcasts. We would encourage you to look at and discuss this presentation with your child.

To support students with their revision, the science faculty will be holding revision sessions every week on Wednesdays and Thursdays from 3:30-4:30pm. There will also be a lunchtime revision session on Monday each week. Revision sessions will focus on exam questions and exam technique. Revision sessions will rotate through biology, chemistry and physics topics. We would strongly recommend that all students attend one session a week.

Should you have any questions please do not hesitate to contact me on 01275 373737 or by email [iveyz@skdrive.org](mailto:iveyz@skdrive.org). Thank you in advance for your support.

Yours sincerely

*Zoe Ivey*
