Create the impossible.

## Our Environment Needs a Voice

Our environment is not a joke.  
The voices of the next generation have spoke.  
We need to lower our carbon emissions,  
have you not seen its current position?  
Earth is dying as we speak.  
Quick, before another river starts to leak.  
The environment does not have a voice.  
But it is obvious that you have made the wrong choice.  
Our forests are shrinking, a football pitch a second.  
Both humans and animals are threatened.  
Coral reefs are drying out,  
we must do something, without a doubt.
