

How's it doing up there? by Shay melias 7/21

Present isn't at all that good,
the pandemic is only getting worst,
as the world starts to heat up,
ice starts melting,
leaders of our frigs will not stop fighting,
the cons go on and on,
the frig to save our world gets more frantic,
but at the end of the day all I can say is,
I wonder how your doing up there,
is there flying cars?
have we landed on mars?
is there still a global pandemic?
have women gained there rights?
have we all thought hey lets not fight?
but when I lay down at night,
I wonder what it's like up there!

Small

stop the war!!
